INSTAGRAM ACCOUNT AUDIT REPORT

@sample.creator

PREPARED SEPTEMBER 12, 2026

PREPARED BY ALTR

SCOPE PUBLIC PROFILE, LINK FUNNEL, RECENT CONTENT REVIEW

CONFIDENTIAL — PREPARED FOR THE ACCOUNT OWNER

1. EXECUTIVE SUMMARY

Overall risk grade: D
Primary problem in one sentence: The account's recurring reel format — bedroom-set, body-focused framing with an adult-platform link one hop past the Linktree — has almost certainly triggered account-level recommendation ineligibility.
Is account-level recommendation ineligibility likely active? Probably — non-follower views collapsed ~12x around July 30 and have not recovered across 14 posts.

The account is not at immediate risk of being disabled, but it is almost certainly invisible to non-followers. Two posts carry removal/strike risk and should be archived today.

Findings at a glance: 2 Critical · 4 High · 3 Medium · 2 Low

2. ACCOUNT-LEVEL FINDINGS

CRITICAL — ADULT PLATFORM REACHABLE ONE HOP FROM BIO LINK

- **What we found:** Linktree contains a Fansly link labeled "the rest of me 🥵".
- **Policy tripped:** Sexual Solicitation (removal layer) + sexually suggestive recommendation exclusion.
- **Fix options:**
  - *Adjust:* Remove the Fansly entry from the Linktree entirely.
  - *Rework:* Route paid-platform discovery through off-Instagram channels.
  - *Remove:* Replace Linktree with a direct link to a clean site.

3. CONTENT FINDINGS

#	POST	ISSUE	POLICY / LAYER	SEVERITY	RECOMMENDED ACTION
1	Aug 28 reel — mirror try-on	Close-up inserts at 0:04/0:11	Suggestive / demotion	HIGH	Recut wide, new cover frame
2	Aug 21 reel — "gym fit check"	Neutral activity framing	—	LOW	None; this is the model to follow
3	Aug 14 post — lingerie set	Implied nudity pose	Adult nudity / removal	CRITICAL	Archive today

4. ACTION PLAN

Today: archive posts #3 and #7; remove Fansly link from Linktree.
This week: recut the three HIGH reels; rewrite captions per Section 3 notes.
Ongoing: shift to the activity-forward format of post #2 — 2–3 examples included below.

> Expectations: reach recovery typically lags cleanup by 2–6 weeks of consistent clean posting. Do not judge the plan at day 5.
