ALTR

INSTAGRAM ACCOUNT AUDIT REPORT

@thegabedias

PREPARED SEPTEMBER 12, 2026

PREPARED BY ALTR

SCOPE PUBLIC PROFILE, LINK FUNNEL, RECENT CONTENT REVIEW

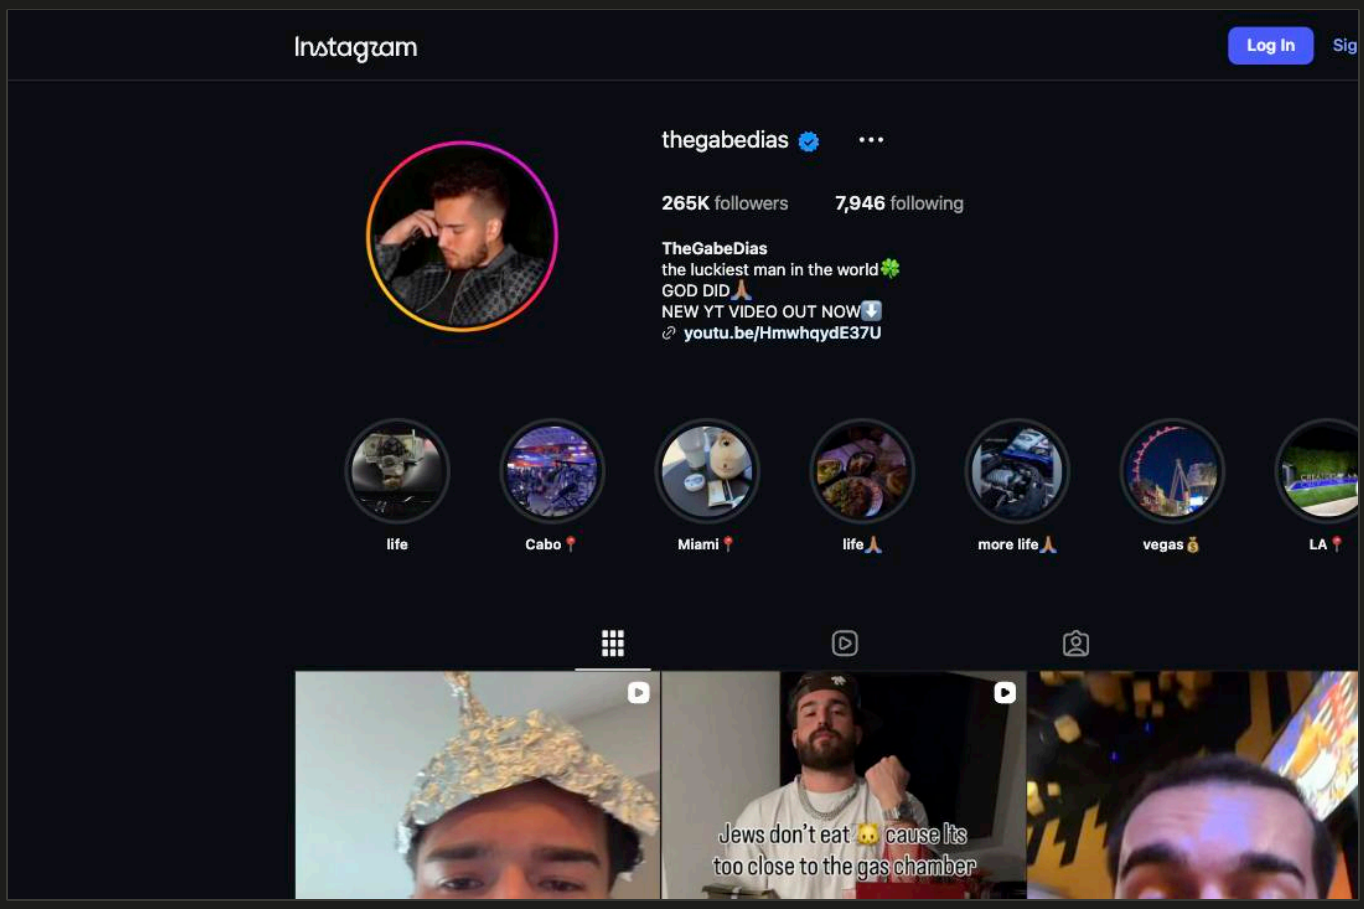

CONFIDENTIAL — PREPARED FOR THE ACCOUNT OWNER

1. EXECUTIVE SUMMARY

Overall risk grade: F
Primary problem in one sentence: The account's signature "shock flex" format currently includes at least two standing posts whose text overlays are outright hate speech (a Holocaust gas-chamber joke and an anti-Asian slur paired with a Pearl Harbor joke) — removal-and-strike-layer violations that put the account itself, its verification, and every brand deal at risk, on top of an already-collapsed content funnel.
Is account-level recommendation ineligibility likely active? Almost certainly, and it's the smaller problem. Where like counts are visible, reels earn 1.6K–2.5K likes on 265K followers (~0.6–0.9%) with 50–60 comments; like counts are hidden on the edgiest posts. But this account's exposure is strikes, not just reach.

This audit has a different shape than most: the majority of the recent grid is genuinely workable comedy — game bits ("SILENT LIBRARY PT.1"), gym bits ("Day 0 of locking in!"), shopping and barber bits — that is compliant, recommendable, and where the audience's positive engagement visibly lives. Layered on top of it are (a) hate-speech shock overlays that are strike inventory sitting in public view, and (b) an undisclosed referral-code promotion for "Trench," a crypto/memecoin trading app, wrapped in "FULL PORT" (go all-in) messaging. Those two layers are what's getting the account flagged, and neither is fixable by rewording — they have to stop. The comedy underneath them doesn't.

Findings at a glance: 2 Critical · 3 High · 4 Medium · 1 Low

— Profile at audit time: verified, 265K followers, following 7,946. Bio claims "NEW YT VIDEO OUT NOW⬇️" — the link goes to an 11-month-old video (see Section 2). Highlights (life, Cabo, Miami, Vegas, LA) are clean lifestyle content.

2. ACCOUNT-LEVEL FINDINGS

HIGH — THE "SHOCK FLEX" FORMAT IS GENERATING STRIKE-LAYER VIOLATIONS, NOT JUST DEMOTIONS

- **What we found:** The account's recurring format — luxury flex visuals (cash stacks, Cartier, designer bags) with an outrageous overlay line — currently escalates into slurs and atrocity jokes (see the two CRITICAL items in Section 3). The audience knows the reference points (a commenter: "Did you download the brickboy Dior update… you sound and act exactly like him").
- **Policy tripped:** Hate Speech / Dangerous Organizations & Individuals (Holocaust mocking is explicitly enforceable) — Community Standards, **removal + strike layer**. This is the layer that disables accounts, removes verification, and kills monetization eligibility; it also explains flags that arrive "randomly" — these posts get reported in bursts every time a clip travels.
- **Why "edgy comedy" doesn't protect it:** Meta's hate-speech policy has no satire carve-out a classifier or first-line reviewer will apply; slur + protected group + atrocity reference is a near-automatic action. Repetition converts individual removals into account-level restriction and eventual disable — for a verified account, that also risks the badge.
- **Fix options:** *Adjust:* none — no rewording of a gas-chamber joke is compliant. *Rework:* keep the exact same format (flex + absurd overlay) with absurdist, non-protected-group targets — self-deprecation, wealth absurdity, roommate feuds; the format is fine, the targets are the violation. *Remove:* delete (not archive) both CRITICAL posts today.

- **Our recommendation:** Delete today + hard rule going forward: no slurs, no protected-group jokes, no atrocity references, in overlays, audio, or captions. This is the single change that stops the flagging cycle.

HIGH — UNDISCLOSED CRYPTO-TRADING PROMOTION ("TRENCH") WITH ALL-IN MESSAGING

- **What we found:** The Sep 4 reel is captioned "LIFE IS FREE WHEN U FULL PORT" (full port = putting your entire portfolio into one trade) and the 4-day-old money-flex reel is captioned "AINT NOTHIN GONNA STOP ME FROM GETTIN PAID"; comments on both confirm an active referral funnel for the Trench trading app ("I signed up for Trench with your code," "I used code Gabe on trench check dms," "What's a good <100 trade"). No paid-partnership label on any of it.
- **Policy tripped:** Meta restricts promotion of cryptocurrency trading products — eligibility requires written permission that organic referral-code promos never have; unlabeled paid promotion also violates branded-content policy. Separately, "full port" messaging to a general audience is the kind of financial-harm framing that draws both platform action and FTC attention (undisclosed material connection + implied earnings claims).
- **Why it matters:** Combined with the hate overlays on the same posts, this reads to a reviewer as a scam-adjacent account pattern: shock content + cash flexing + "use my code." That pattern gets accounts disabled outright, not demoted.
- **Fix options:** *Adjust:* if any sponsorship continues, it needs the paid-partnership label, no earnings implications, no "full port" framing — and even then, an unregistered memecoin platform will not survive review. *Remove:* end the Trench promos on Instagram entirely; keep trading content, if any, on platforms whose rules allow it with proper disclosure.

- **Our recommendation:** Remove. This funnel earns pennies against the account it's endangering.

HIGH — BROKEN BIO FUNNEL

- **What we found:** Bio says "NEW YT VIDEO OUT NOW⬇️" — the link (youtu.be/HmwhqydE37U) is an **11-month-old** video ("CUTTING ON CUT WATERS – LEANER BY THE DAY EP.1", 1K views) on a YouTube channel with **86 subscribers**.
- **Why it matters:** No policy issue — but the account's only bio CTA is stale by nearly a year, and the 265K→86 audience conversion says the funnel has never worked. Same lesson as every audit: reach is being spent pointing at nothing.
- **Fix:** Replace with a current, evergreen destination (channel page, not a single video), or drop the link until the YouTube relaunch is real.

MEDIUM — CONSPIRACY-BIT FORMAT

- The tinfoil-hat reel ("They're putting this shit right in our faces bro.") is satire, but conspiracy-formatted content is scored for recommendation demotion regardless of intent (classifiers key the visual + phrase pattern, not the joke). Keep the bit clearly absurd (props, punchline in-frame) or expect these reels to underperform.

— The tinfoil-hat conspiracy bit — satirical, but formatted exactly like the content class Instagram demotes.

MEDIUM — COMMENT SECTION IS UNMODERATED

- Recent posts carry duplicate scam-bot walls (the same "super villains" scam comment posted 4x), referral beggars, gambling/forex accounts, and slurs from commenters. An unmoderated comment section both feeds the classifier's read of the account and repels brands.
- **Fix:** Hidden Words on (including custom list: slurs, "code," "check dms," "signed up with your"), delete/report the bot walls weekly, restrict repeat offenders. 20 minutes to set up.

MEDIUM — FOLLOWING 7,946 AT 265K FOLLOWERS

- Legacy follow-back growth signal; batch-unfollow to under ~1,000 over the next month. No automation tools while doing it.

MEDIUM — HIDDEN LIKE COUNTS ON THE EDGIEST POSTS

- Like counts are hidden exactly where the content is most inflammatory. That's the client managing optics instead of the problem — and it does nothing for reach or enforcement. Unhide once the content mix is fixed; public engagement recovering is also the client's own recovery signal.

LOW — ALCOHOL-FORWARD SERIES BRANDING

- The bio-linked "Cutting on Cut Waters" series (drinking canned cocktails while cutting) is fine for adults but lands in the alcohol bucket that's filtered from under-18 audiences and mildly demoted. Not worth changing unless teen reach matters to the client's sponsors.

3. CONTENT FINDINGS (NEWEST FIRST; ★ = GRID-TILE EVIDENCE, PERMALINK NOT EXPOSED LOGGED-OUT)

#	POST (DATE / DESC)	ISSUE	POLICY / LAYER	SEVERITY	RECOMMENDED ACTION
1	★ Grid reel — money/Cartier flex, overlay: "Jews don't eat 🍇 cause its too close to the gas chamber"	Holocaust mockery + antisemitic trope	Hate speech / removal + strike	CRITICAL	Delete today
2	★ Grid reel — same flex staging, overlay: "Went to panda express today, didn't leave a tip. That's for Pearl Harbor n***a"	Anti-Asian atrocity joke + slur	Hate speech / removal + strike	CRITICAL	Delete today
3	4d reel — "SILENT LIBRARY PT.1" (60 comments, likes hidden)	Clean game-show bit — this is the compliant core format	—	LOW	Keep; make this the flagship series
4	4d reel — "AINT NOTHIN GONNA STOP ME FROM GETTIN PAID" (53 comments, likes hidden)	Money-flex + active Trench referral funnel in comments	Restricted financial promo / removal-risk	HIGH	Delete or strip all Trench ties + label

#	POST (DATE / DESC)	ISSUE	POLICY / LAYER	SEVERITY	RECOMMENDED ACTION
5	Sep 4 reel — "LIFE IS FREE WHEN U FULL PORT" (51 comments)	"Full port" all-in trading messaging + code referrals	Restricted financial promo / removal-risk	HIGH	Caption rewrite removes trading framing; end code promos
6	Sep 3 reel — "THE ONLY WAY TO START MY DAY" (61 comments, likes hidden)	Clean morning-routine bit	—	LOW	Keep
7	Sep 1 reel — "Day 0 of locking in!" (1.6K likes)	Clean gym bit	—	LOW	Keep
8	Aug 27 reel — "I LOVE SHOPPING!" (2.5K likes)	Clean shopping bit	—	LOW	Keep
9	★ Grid reel — tinfoil-hat bit ("They're putting this shit right in our faces bro.")	Conspiracy-format satire	Recommendation demotion	MEDIUM	Keep the bit; sharpen the absurdity so it can't be read straight

Mapping caveat: Instagram rotates reel thumbnails, and logged-out browsing exposes only 6 permalinks; items 1–2 are documented from grid-tile screenshots and may correspond to posts 4–5's videos or to separate posts. Either way the overlays are live on the public grid today — the client can locate them in seconds from their own account.

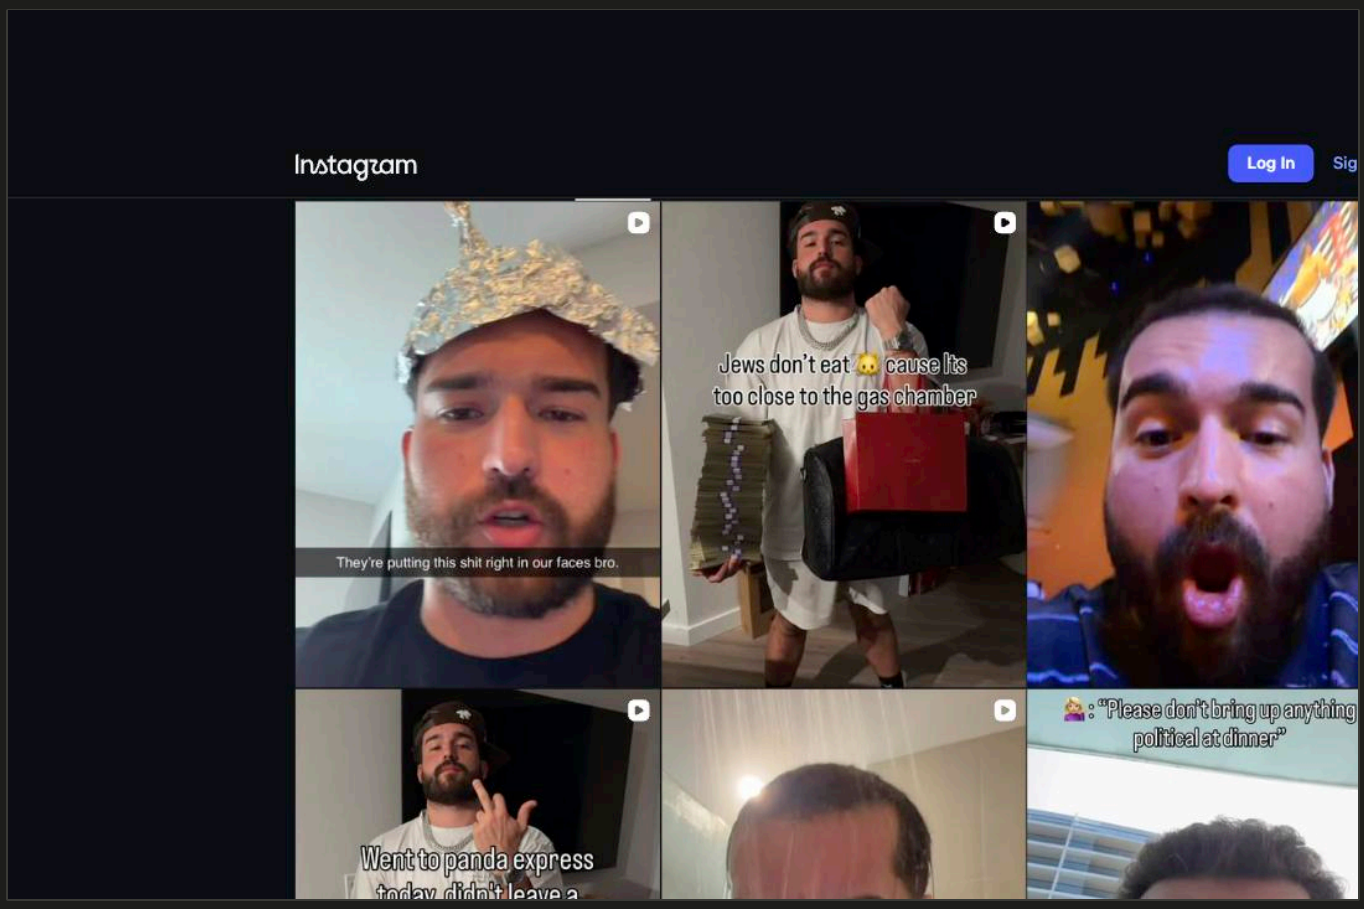

EVIDENCE — THE TWO CRITICAL ITEMS

— CRITICAL item #1, live on the public grid at audit time: money/designer flex with a Holocaust gas-chamber "joke" overlay. Under Meta's hate-speech standard this is removable with a strike regardless of comedic intent, and it re-flags every time the clip travels.

— CRITICAL item #2: the same flex format with an anti-Asian slur + Pearl Harbor punchline ("…didn't leave a tip. That's for Pearl Harbor n***a"). Slur + protected group + atrocity reference is a near-automatic enforcement action.

— The grid at audit time: the hate-overlay reel sits between two clean comedy bits. One format, two futures — the bits to either side are recommendable; the middle tile is strike inventory.

4. PATTERN ANALYSIS

The account is two accounts in one. The larger one is a competent absurdist-comedy account — game bits, gym bits, roommate energy — whose posts draw warm, engaged comments ("Bro yall never fail to make me laugh") and whose format needs nothing but consistency. The smaller one is a shock-and-flex persona borrowed from the "brickboy" genre — slur-laced overlay one-liners over cash and Cartier, plus a crypto referral funnel — and it is the entire source of the account's enforcement problem. The engagement data doesn't even reward the shock content: the clean gym and shopping bits carry the account's best visible numbers (1.6K–2.5K likes), while the flex posts hide their likes. The client isn't paying a "spice tax" for growth — they're taking platform-fatal risk for content that performs worse than their clean material.

5. ACTION PLAN

Today (this is urgent, not routine):

1. **Delete** — not archive — the two hate-overlay reels (Section 3, items 1–2). Standing hate-speech content is strike inventory and a re-report magnet; every day up is another chance of a strike or a press screenshot.
2. Sweep the grid and stories/highlights for any other slur or atrocity-joke overlays this audit couldn't see logged-out; same rule, same day.
3. End the Trench referral promotion: remove code mentions from any pinned comments/stories, stop replying to code questions, and don't post the format again.

This week:

1. Check **Settings → Account Status** and appeal nothing in this category — appeal only items that were actually clean; hate-speech appeals that fail accelerate restrictions. Screenshot both panels for the re-audit.
2. Fix the bio: drop "NEW YT VIDEO OUT NOW" or point it at a live destination; rewrite bio to frame the comedy brand.
3. Turn on Hidden Words + custom filters; purge the scam-bot comment walls; restrict repeat offenders.
4. Rewrite item 5's caption to drop the trading frame (e.g., "spent the whole check at the barber. worth it." — keeps the joke, kills the "full port" signal).

Ongoing format changes (the durable fix):

1. Make "SILENT LIBRARY" a numbered flagship series (PT.2, PT.3 weekly) — it's the account's best format and it's fully recommendable.

2. Keep the flex-absurdism if wanted, with targets that aren't protected groups: the overlay formula works the same with "I tipped 40% cause I'm rich and scared of confrontation" as it does with a slur — one of these builds a brand advertisers can touch.
3. Unhide like counts once the mix is clean; treat public engagement recovery as the health metric.
4. Batch-unfollow toward <1,000; no growth automation during recovery.

Expectations: the strike layer matters more than the reach layer here. If the account already carries hate-speech strikes, some restrictions persist on a fixed clock even after cleanup (strikes age out; the client can see timelines in Account Status). Reach on clean content should begin recovering in 2–6 weeks of consistent posting after the deletions.

6. WHAT THE CLIENT NEEDS TO PULL (WE CAN'T SEE IT FROM OUTSIDE)

1. **Settings → Account Status** — both panels ("Removed content" / "What can't be recommended"), screenshots, plus any strike notifications from the last 90 days.
2. **Insights → Reach → non-follower %** for 30/90 days, and view counts on the last 15 reels.
3. Whether like-count hiding was manual (and on which posts).
4. The full list of any sponsorships (Trench or otherwise) and whether any had paid-partnership labels.
5. Stories/highlights sweep results from Action Plan item 2 — we could not view stories logged-out.

7. RE-AUDIT

Recommended at **30 days**: verify the deletions, Account Status trajectory, comment-section health, and grade the new content mix. If strikes were already on the account, set expectations against the strike-decay timeline shown in Account Status.

This audit assesses compliance with Meta's published Community Standards and Recommendation Guidelines as understood at the audit date. Platform enforcement is partly discretionary; no compliance change guarantees restoration of reach. All recommendations aim to make content genuinely compliant — we do not advise tactics to disguise violating content, which converts reach problems into account-loss problems.
