THE FULL NETWORK, FIVE DAYS

HOW THE PUSH RUNS

~5 DAYS END TO END

01

Sound locked

You bring the track. Tier and start date set.

02

Days 1–5

Reels roll across the network. Story reposts and notes run in the first 24 hrs.

03

Day 3+

Chart position becomes visible — Instagram's trending data runs about three days behind.

04

On delivery

Proof pack plus a reel-by-reel report, verified in Chartmetric.

WHAT TO KNOW BEFORE YOU BOOK

SET EXPECTATIONS ONCE

The chart runs three days behind

Instagram's trending data is roughly 72 hours late, so a placement will not appear before day three of a five-day run — the push is working before the chart says so.

Audio level is set per theme

The sound goes under content on thousands of built-up theme pages. Where the original audio carries the video — a comedy page where the joke has to land — the music sits lower. Forcing it up kills the reel, and a dead reel does not chart.

There is more than one US chart

Instagram serves several trending charts in the States, so a placement may not show on the one you see. Proof is supplied either way.

Every run is reported

A reel-by-reel report on every placement delivered, with results verified independently in *Chartmetric*.
